Notes for Online Voter Registration Procedures

Log on to ova.elections.il.gov

There is a link to determine if the person is already registered.

To use this method of registration the person must have either an Illinois Driver's License or State ID.

The address on this ID must be the same as the current residence from which the person wants to register.

The person will be asked for the last 4 digits of her/his Social Security number to complete the registration.

A few hints:

Driver's licenses begin with a letter (first letter of the last name)

State IDs end with a letter (first letter of the last name)

For the letters I, O and S a number if a number is inserted instead this is not valid and the registration will not be processed.

On the address screen it is not necessary to fill in "post direction"

If an email address is supplied (optional) the voter might receive emails from the political parties.

At the end if the registration is "matched" there will be a reference number, suggest that a screen shot be taken.
